

3M™ Mobile Privacy Film

## Get Screen Smart

*Because everyone needs a little privacy!*

No one wants private information exposed.

Whether it's smartphones, PDAs or video-enabled mobile phones, 3M Mobile Privacy Film protects on-screen information so your mobile communications stay confidential, even in the most public places.

3M Mobile Privacy Film makes screens look black from the side, preventing others from viewing your screen information and preventing the invasion of your personal space.

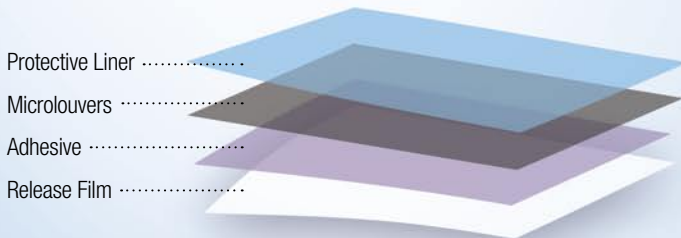

# Create a private space in a public place

## Introducing 3M™ Mobile Privacy Film

Now you can use your mobile phone or PDA without worrying about sharing information with the world around you. 3M Mobile Privacy Film helps protect your “need to know” communications from becoming public information. The film also helps protect against scratches and damage to your LCD display. With a light matte front surface, 3M Mobile Privacy Film enhances your viewing experience by reducing glare. And 3M Mobile Privacy Film offers a residue-free adhesive that's easy to apply and easy to remove – an ideal solution for replacing the film on your device whenever you need.

Item #	Mfr. #	Description	List
882-065	MMM78784	4.3" Privacy Film	\$12.05

### FEATURES:

Helps protect confidential communications including internet use, email, text messages and downloads on cell phones, PDAs, smartphones and more.

Darkens your device screen when viewed from the side. User sees clearly while others see a dark screen.
